

# TRAFFIC SURVEILLANCE

Partner: Digitalcom (Thailand)

## About DigitalCom

Digitalcom is a trusted leading provider in Thailand of network security systems, network voice & video communications systems, Network Infrastructure etc. As a main distributor of the world's market leader in network video surveillance, network access control, network video conference. Digitalcom delivers quality products & solutions holding incremental value through their nationwide resellers and dealers.

## Project overview

Digitalcom has multiple surveillance camera networks in place in several cities throughout Thailand. The company uses the Milestone VMS software to operate the camera networks. Digitalcom was looking for a video analytics solutions provider who can deliver its license plate recognition and vehicle identification services under Milestone.

## Features and Advantages

- Asura Technologies delivered a seamless integration of its license plate recognition and vehicle make, model, category and color recognition software under Milestone Xprotect.
- Digitalcom uses Asura Technologies' license plate recognition and vehicle identification software for traffic monitoring purposes for the urban environment in several cities with high efficiency.
