

THE ARC SUITE

INTELLIGENT PARKING COMPLIANCE SOFTWARE

COMPANY OVERVIEW

ASURA develops next-generation software automation technology that transforms manual parking operations into data-driven, intelligent compliance ecosystems. We empower operators to monitor, manage, and optimize their entire parking portfolio; from small private facilities to complex municipal or mobility environments.

THE ARC SUITE

The ARC Suite is ASURA's unified monitoring and analytics platform designed to connect on-site cameras, collect real-time data, and translate it into actionable operational insights. Through advanced AI recognition and high-clarity analytics, the ARC Suite gives operators complete oversight and control, regardless of environment, complexity, or scale.

ARC FLEX

SMART DATA COLLECTION

AI-powered baseline monitoring delivering precise, real-time visibility.

- AI Vision: ANPR, vehicle attributes & movement detection
- Expert Layout Planning guided by ASURA specialists
- Single Interface for full portfolio monitoring

ARC INSIGHTS

ACTIONABLE ANALYTICS

Purpose-built intelligence for daily operations and long-term planning.

- Integrator API for seamless system connection
- Tailored & Pre-built Reporting Dashboards
- Proactive Decision Support with insight streams

WHY CHOOSE THE ARC SUITE?

- Camera-agnostic Software
- 99+% ANPR Accuracy in Challenging Environments
- Deployment within Weeks
- Short-term Reporting + Long-term Analytics
- Fast platform integrations

BUILT FOR EVERY PARKING ENVIRONMENT

- Any size: private lots to municipal & event venues
- Indoor/outdoor optimized setups
- Fixed or mobile analytics
- Free-flow or gated traffic

GLOBAL PERFORMANCE & PROOF POINTS

- 500+ automated & 500+ semi-automated U.S. operations
- Budapest Airport: SKIDATA-integrated curbside compliance
- Several European time-compliance installations

FOR PRICING & CONFIGURATIONS

For modules, scaling options, or deployment specifications, contact Paralign, the global distributor of the ARC Suite.
