

ASURA MOBILITY SUITE

FOR ULTIMATE PROJECT
INTELLIGENCE

COMPANY OVERVIEW

Mobility projects succeed when software meets the reality of streets, depots, and control rooms. ASURA offers a practical intelligence layer that sits on top of your current tools. From smart city pilots to nationwide programs, we turn raw events into decisions that operators, municipalities, and research teams can act on immediately.

THE ASURA MOBILITY SUITE

A modular platform that integrates with diverse mobility stacks to support enforcement, urban safety, and C-ITS use cases. ASURA unifies data capture and analysis so projects can scale, from single corridors to citywide deployments, while preserving existing workflows.

ASURA VISION

GRANULAR DATA COLLECTION

- AI Vision: ANPR, categorization, VRU identification, Make & Model, counting, and direction
- Purpose-built engineering: Hardware sourcing and consultancy tailored to complex mobility environments
- Plug-and-play integrations: Compatible with the Milestone XProtect VMS platform and AXIS cameras

ASURA INSIGHTS

INTELLIGENT DATA ANALYTICS

- Pre-processing: Direct stream searchability, evidencing and labeling at capture
- Data visualizations: Dashboards for standalone or VMS-embedded use
- Predictive analytics: Reliable forecasting; large-volume, high-confidence data

WHY CHOOSE THE ASURA MOBILITY SUITE?

- AI-enhanced Accuracy
- Flexible Classification
- Swift Integration and Deployment

BUILT FOR COMPLEX MOBILITY CHALLENGES

- Congestion Charging
- Public Transport Priority Measures
- Low & Zero Emission Zones
- GNSS Data Support Layer
- Area Safety & Security Monitoring

PROVEN DEPLOYMENTS

- Royal Thai Police Road Enforcement: Milestone-based integration and 50+ Mobile Control Units deployed across 3 police districts
- Unio Telecom Industrial Security: Automated perimeter monitoring with full access-point traffic documentation and anti-theft capabilities, actionable alerts and evidencing

FOR PRICING & DOMAIN-SPECIFIC CONSULTANCY
